ABOUT **PADEL CONNECTION**

Padel is a racquet sport which combine the elements of tennis, squash and badminton. It is only played in doubles, and is practiced outdoors as much as indoors.

The game was invented by Enrique Corcuera of Mexico, who created the first padel club in Marbella in 1974. The sport became very popular in Spain, which has been the professional circuit host of the World Padel Tour where it has been played since 2005. Over the course of the past 10 years, padel has begun to spread rapidly to the rest of Europe as well as to the United States.

Extremely fun, social and accessible for all, padel is a breath of fresh air that is revitalizing clubs with an activity complimentary to tennis.

Thanks to its success, padel is now practiced by more than 10 million players and is the fastest-growing sport in the world.

Padel Connection is a 100% French padel court constructor. Padel Connection specializes in the management of key-in-hand padel projects, personalized for each client. We wish to go beyond the simple installation of your courts. Through our concept of full service, we put our expertise at your disposal in order to help you manage your club and be successful.

Because your success also means our success.

BENEFITS OF PADEL

A MAXIMUM OF FUN

- Less physical effort is required than in tennis or racquetball
- Longer rallies due to the small size of the court and the fences
- More time playing and less time picking up balls
- Rallies are incredibly fun for players

50mn of real game per hour versus only 15mn of real game for tennis!

ACCESSIBLE FOR EVERYONE

- Players learn how to play relatively quickly and improve fast. We can play immediately!
- The point starts with a serve underhanded which is an easy shot to make and to return
- There are two chances to hit the ball, before and after the glass
- The racquet is very easy to handle

Whether you are a beginner or an expert, everyone can have fun playing padel!

SOCIAL AND FRIENDLY

- It's a team sport, only played in doubles
- Having 4 people at the same time on a small court brings everyone closer, making social conversation between players a much more integral part of the game
- It's an entertaining sport to play and to watch

It is an intergenerational game, in which grandparents can play with parents and kids, and everyone can have fun together.

INTEGRAL SERVICE

AN INTEGRAL SERVICE TO CREATE AND DEVELOP

Padel Connection, it's your unique interlocutor to help you realize your padel project from the beginning to the end.

Because padel is a brand new sport, it takes time to understand all the secrets of this sport.

Our expertise and experience will help you be efficient and make your structure grow.

Supported by a network of professionals and partners all around the world, we can find adapted solutions to the needs of each customer.

OUR PADEL COURTS

100% CUSTOMIZABLE COURTS

We offer an infinite number of combinations so that each client can find the court most adapted to their budgets, tastes and needs. Clients can choose:

- ⇒ The court style (classic, panoramic, full panoramic, single or baby)
- ⇒ The color and motifs of the structure
- ⇒ The type of turf (fibril or monofilament) as well as its color
- ⇒ The thickness of the glass (10 or 12mm)
- ⇒ The type of lighting (halogen or LED)

STANDARD COMPETITION

This padel court is the most commonly used for leisure and competition, offering the best quality-price ratio. It is available in a wide range, making it accessible on the basis of the needs and budgets of all.

PANORAMIC

It differs from the standard with its sleek design and more sophisticated construction. Its two large panoramic glasses at the front and back of the court are set in a solid frame, assuring perfect stability and security.

OUR PADEL COURTS

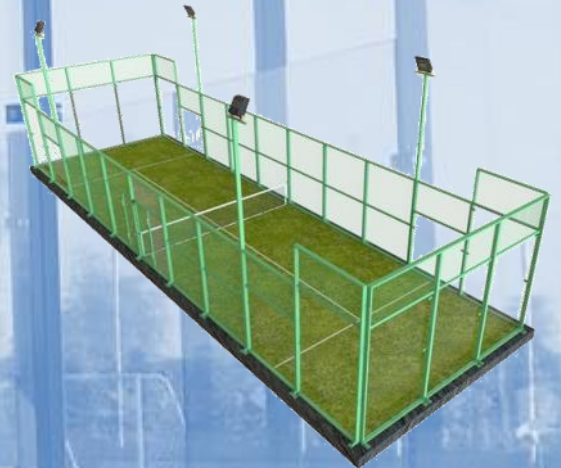

FULL PANORAMIC

Unequaled in terms of elegance, it provides the ultimate gaming experience and allows spectators to join the show with excellent visibility. It comes with 12mm glass set in a solid frame to ensure the best stability and security.

SINGLE - 6M X 20M

This single court is often used in Spain on the one hand in response to the growing demand of players who cannot always find three other players for a game, and on the other hand in response to the problem of limited space.

BABY - 5M X 10M

This is truly a miniature version of the double court as it is half the width, length and height. An ideal court for children up to 10 years who will be able to have fun with or without a racquet.

THE COVERED STRUCTURE

Our solution for covering your courts is a modular cover that is easy to install and will allow you to play even during bad weather.

End the shortfall, fill your courts 100% of the time!

UP TO 11M HIGH

ASSEMBLED IN 72H

IN ACORDANCE WITH EC3

200KG/M² OVERLOAD

10 YEAR WARRANTY

**The only industrial modular cover registered at the
Barcelona College of Engineering.**

WWW.PADEL-CONNECTION.COM - 2015

CONSTRUCTION OF COURTS

At Padel Connection, quality is at the heart of our concerns. All of our courts are constructed by our engineers with concern to the smallest detail according to a process that is 100% in accordance with the specifications established by the Fédération Française de Tennis.

We have our own technical office composed of specialized technicians who will install your courts. A 100% French know-how accompanied with an expertise in this field ensures a maximum quality installation. The construction is done in two steps: first the concrete foundation then the installation of the court.

STEP 1: BASE WORKS

Our team of specialists will build your concrete base, an essential element in the construction of your padel court. A well-done slab will prevent false rebounds and allow better rainwater evaporation. We assure foundations that are solid, durable and perfectly adequate to accommodate future padel courts. Security is our priority, and all of our work is covered by a ten-year warranty.

CONVERSION OF A TENNIS COURT

It is also possible to build a padel court on an existing tennis court, a very interesting solution for tennis clubs because of the small size of the court, and also because the concrete of the tennis court can be used.

INSTALLATION OF THE COURTS

An ultimate level of attention to detail, including the following points which are too often neglected:

- The glass is perfectly aligned with the fence.
- In the corners, the two perpendicular glasses stick to each other, therefore eliminating the usual gaps that create a bad bounce.
- For the sake of eliminating bad bounces, we position the turf so that it slightly exceeds the limits of the court.
- We verify the quality of the slab before laying the foundations in order to avoid any bad bounces and problems with water evaporation
- A 10 year warranty which covers the entire infrastructure.

Our courts were created to offer the safest and most comfortable gaming experience as well as the best possible environment for players and spectators.

INTEGRAL SERVICE

PADELCLICK 

Gestiona tu club en la nube

CLUB MANAGEMENT SOFTWARE

PadelClick is the ultimate management software for your padel club, world leader with already more than 500 clubs. Easy and intuitive, it offers functions for players, coaches and managers. A modern and efficient cross-platform solution to support you every day.

ALL CANDIDATES WILL RECEIVE A FREE TECHNIQUE NOTEBOOK, A PADEL MANUAL WITH FEDERATION STANDARDS AND RULES, AND A TRAINING CERTIFICATE

BENEFITS FOR YOUR CLUB

PADEL IS MORE PROFITABLE THAN TENNIS

- You can build two or three padel courts on one tennis court (depending on size of the sides)
- A padel court is cheaper than a tennis court
- Padel games usually last longer than tennis games (from 1h30 to 2 hours)
- Padel is only played in doubles, so four players on the court at the same time means more revenue per hour!
- Padel gives you the opportunity to increase your revenue from food and beverage

**40€ / PADEL COURT
ON 200M²**

VS

**20€ / TENNIS COURT
ON 600M²**

AMBITION

Become a pioneer by
developing THE sport of the 21st century.

GET SOCIAL

Boost your club with a fun
sport that creates a very
friendly atmosphere

BENEFITS

Increase your revenue with a
better profitability than ten-
nis and a fast return on
investment.

DIVERSIFICATION

Diversify your offer with this new sport and
reach new targets in search of a sport more
accessible than tennis.

WHY CHOSING PADEL CONNECTION ?

OUR SPONSOR

- ⇒ Our sponsor Alizé Cornet will ensure the promotion of your structure on her social networks
- ⇒ Promote your club by organizing exhibition games with the best padel players of the world
- ⇒ Get the best deal for your padel material thanks to our network of partners

DATASHEET

THE ADVANTAGES OF ALUMINIUM

A special feature of our court is that the load-bearing structure (the post) is made up of a powder coated aluminium profile while other constructors offer only steel. Aluminium presents the following advantages:

By its chemical composition, aluminium has a natural resistance to atmospheric corrosion. 15 year warranty on the aluminium profile as well as on the powder coated.

Aluminium is much lighter than steel and easier to manipulate. In the case of a player colliding with the structure, it can absorb more of the shock than steel.

The aluminium is lacquered in the color of your choice. It is also possible to incorporate graphic motifs on the structure of any image of your choice!

Aluminium is a 100% clean recyclable material. You will be able to thus benefit from the grants on behalf of some town halls that encourage projects carried out in sustainable development.

GALVANIZED STEEL FENCING

The steel that we use for the fencing is 4mm thick C9D steel which allows a **better rigidity and resistance** than other courts which generally use 3mm. This is a steel which is often used in outdoor constructions because of its strong **resistance to atmospheric corrosion**. The steel is also **galvanized**, a process which is designed to **increase the court's resistance to weather**.

All of the fastening hardware is in stainless steel.

THE GLASS - Standard NF EN 1250-1

The tempered glass is treated through a process to **improve its mechanical properties**. Tempered glass is two to **five times stronger** than ordinary glass. Also, this process improves its **resistance to shock, compression, bending and tension**.

We generally use 10mm thick glass for the standard courts and 12mm for the panoramics, which require more strength.

DATASHEET

OUR SYNTHETIC TURF - Standard NF EN 1250-1

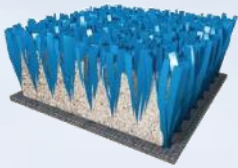

Synthetic turf is an essential component of a padel court. Its quality directly influences the quality of the game, comfort and, most important, the safety of the players.

Our MONDO® synthetic turfs for tennis and padel offer a maximum level of performance, safety, comfort and durability and are strongly recommended by L'Association des Joueurs Professionnels de Padel and by the Fercion Internacional de Padel (FIP).

NSF 66 12

Standard range wire fibril synthetic turf

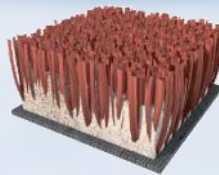

- ⇒ 12mm high / 6600 DTEX
- ⇒ Good shock resistance and anti UV protection
- ⇒ Recommended for leisure

3NX 80 12

Top range monofilament synthetic turf

- ⇒ 12mm high / 8000 Dtex
- ⇒ Excellent shock resistance and anti UV protection
- ⇒ Recommended for competition

The FFT authorizes the addition of doors on your courts. This option is a solution to security problems for clubs that may be subject to vandalism and also to have a better control access for your members.

The net, which is specially designed for padel courts, is supported by 2 aluminium tensors on each side.

A post can be added as an extension of the tensor to separate the door space in half.

The two configurations are approved by the FIP.

LIGHTING - Standard NF P90-110

The court comes with four 6.5m lighting posts. The average level of lighting is superior at 300 lux. The coefficient of uniformity is always superior at 0.7. The client can choose between standard halogen lighting and LED lighting which is up to 40% more economic.

**HALOGEN
LIGHTING
8X400W**

**LED
LIGHTING
8X200W**
